

Innovad® is a global leader in animal nutrition, providing high quality and scientifically supported premixtures, complementary feed and on farm solutions.

Innovad® we combine people's long-time experiences in the field of animal feed and water additives with an innovative approach and dedication to animal well-being and a healthy environment. At the same time, we secure cost effectiveness for the producer.

Because of our growing activities, for our location in Essen, we are looking for:

MAINTENANCE TECHNICIAN

You will be part of our technical team and responsible for the proper functioning of the production machines.

You are able to fix malfunctions and you can provide preventive maintenance for all kinds of machines. In consultation with the production manager, the head of the technical service and your fellow maintenance technician, you think about optimizing and improving the reliability of the machinery.

After an induction period you will be independently engaged in the technical service.

Profile:

A strong motivation, a good learning ability, communication, interest in technology, safety, order and quality are essential.

- Diploma in electromechanics or equivalent through experience
- You possess valid forklift truck certificate, BA4 and BA5 certificate desired
- You are flexible with regard to job content and working hours
- You communicate fluently in Dutch
- Attention to safety, respect, order and neatness
- You are a team player but can also work independently
- You show a great sense of responsibility and accuracy
- Strong will to continuously learn and improve
- Insight into the operation of (process) installation(s) is a plus.
- Good knowledge or initial work experience in the maintenance field of electrical engineering, mechanics, pneumatics and hydraulics are highly desirable
- Knowledge of automation and PLC controls are a plus

Offer: Early start date, career opportunities, competitive salary and meal vouchers, ADV - days.
