

Innovad Mycotoxin Feed Survey 2022

Feed and raw materials mycotoxin survey for 6 mycotoxins: aflatoxins, deoxynivalenol, fumonisins, ochratoxin A, T-2 toxin and zearalenone

The majority of the samples had 2 or more mycotoxins

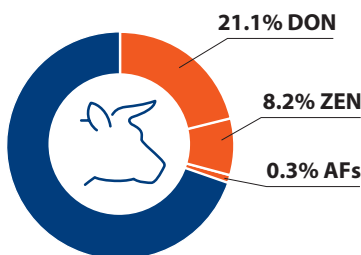

Deoxynivalenol, fumonisins and zearalenone are the most common

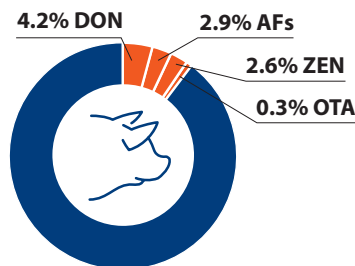

14.8% of the samples exceeded the European limits

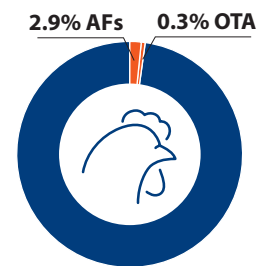

29.7% > EU limits

10.0% > EU limits

3.2% > EU limits

RISE Program: 3-tier strategy to manage mycotoxin risk from raw materials to the farm

1 Rapid test

- High sensitivity with only 15 minutes
- Six mycotoxins, and 4 in 1 extraction

2 Complete test

- LC-MS/MS with high sensitivity
- 16 key mycotoxins including emerging mycotoxins

3 Myco-Marker®

- 36 mycotoxin biomarkers in blood using FTA cards
- Specific for your farm
